Sample Education Product for Outreach Events

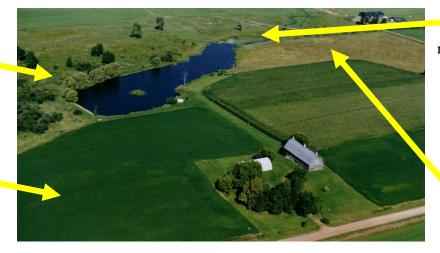

Carbon Sequestering on the Milewski Farm

The Milewski Farm Removes 164 Tons of Carbon each year

20 acres of Temperate Afforestation removes 30 tons of carbon

50 acres of Cropland removes

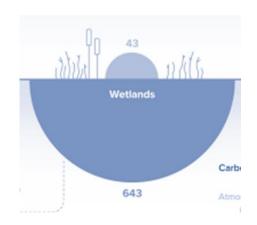

41 tons of carbon

10 acres of Wetlands removes 69 tons of carbon

10 acres of Grassland (Pasture) removes 24 tons of carbon

Where the Math comes from i

Add on practices which can store more carbon:

- 1. Cover cropping
- 2. Low-till
- 3. Create a new Nutrient management Plan which effectively reduces or eliminates the use of herbicides and fertilizers
- 4. Increase the effectiveness of incorporating manure into the soil which means altering some current manure management practices
